## **Sensors: Automotive**

The mass air flow (MAF) sensor, part of your vehicle's electronic fuel injection system, is responsible for calculating the total amount of air entering the engine. A faulty MAF sensor can cause your vehicle to run too rich or run too lean. You'll notice if the tailpipes eject black smoke or when the engine runs rough or

# Access Free Air Flow Sensor 4g93 Engine

backfires.

## **The Symptoms of a Bad Mass Air Flow Sensor - AutoZone**

The mass air flow (MAF) sensor measures the mass flow rate of air entering the engine. This information is then used by the ECU to calculate the amount of fuel needed for the correct air-

## Access Free Air Flow Sensor 4g93 Engine

fuel mixture. If the mass air flow sensor has failed or needs to be cleaned, this can cause especially rich or lean fuel mixtures.

### **Mass Air Flow Sensor/Meter | O'Reilly Auto Parts**

A bad mass air flow sensor won't reliably measure the amount of air coming in

## Access Free Air Flow Sensor 4g93 Engine

through the air filter, resulting in a delay in the fuel delivery during sudden acceleration and a temporary lack of power. In such a scenario, the ECU will sense the drop in engine vacuum first and then using other sensors, will decide if more fuel is required.
