As a branch of mathematics, statistics requires high-level numeracy and quantitative skills as a foundation. However, that's only the beginning. Being a statistician is a bit like being a detective - you need superb analytical skills to determine whether your data is statistically significant, properly interpret it, and test whether your ...

Data science is a "concept to unify statistics, data analysis and their related methods" in order to "understand and analyze actual phenomena" with data. It uses techniques and theories drawn from many fields within the context of mathematics , statistics , computer science , domain knowledge and information science .
