One of the most important books by psychologist Carl Jung. The basis for the theory of psychological types. The basis for Meyers Briggs and a number of other, in my opinion, less accurate, but more popular, theories of types. The foundation for the notions of extraversion and introversion, which are mainstream notions today.

Jung's Theory of Psychological Types and the MBTI® Instrument. The purpose of the Myers-Briggs Type Indicator® is to make the theory of psychological types described by C. G. Jung (1921/1971) understandable and useful in people's lives. The essence of the theory is that much seemingly random variation in behavior is actually quite orderly and consistent, being due to basic differences in ...

C.G. Jung's (1921 / 1971) theory of psychological types attempts to categorize people in terms of their primary modes of psychological functioning. The theory is based on the assumption that there are different attitudes and functions of consciousness. The attitudes and functions operate as pairs of opposite and compensatory tendencies.

Psychological Types is one of Jung's most important and famous works. First published in English by Routledge in the early 1920s it appeared after Jung's so-called fallow period, during which he published little, and it is perhaps the first significant book to appear after his own confrontation with the unconscious.
